Office Action Summary	Application No. 10/643,801	Applicant(s) BHANOT ET AL.	
	Examiner J. E. ANGELL	Art Unit 1635	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submissions filed on 12/23/2009 and 1/12/2010 have been entered.
2. Claims 1, 3-9, 11-17, 22, 44, 58-65 are currently pending and are addressed herein.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on 12/23/2009 is acknowledged and has been entered. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner. It is noted that all references except "A18" (Yu et al. Obesity res. 2003) have been considered. The A18 reference has not been considered because a legible copy of the reference has not been submitted. It is acknowledged that a page from the cited journal has been submitted but the title and first author of one of the abstracts has been blacked-out, thus it can not be determined if it is the Yu et al. reference. That is, the only information in the IDS identifying the citation is the journal issue and page number, title and first author (Yu); however, a reference with that title and Yu as author can not be identified with 100% accuracy. Therefore the reference has not been considered at this time.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 3-6, 9, 11, 12, 22, 44, 58 are rejected under 35 U.S.C. 102(e) as being anticipated by WO 2004/094636 (Arts et al.).

6. Arts teaches a sequence that is 21 nucleotides in length and which comprises the reverse complement of instant SEQ ID NO: 35 (e.g., see sequence 6721 on page 248 of Arts). Arts also specifically teaches a double stranded molecule comprising a first strand and a second strand complementary to the first and specifically indicates that the first strand can be sequence 6721 (e.g., see claims 1-11). Therefore, the double stranded sequence would necessarily comprise a 21 nucleotide sequence that includes SEQ ID NO: 35. Therefore, Arts anticipates the instant claims.
